ROZEFIR

ROZEFIR – Authentic Taste. Real Value. Trusted Origin.

ROZEFIR offers a carefully selected range of organic and natural products:

Rose Syrup – authentic taste, delicate aroma, perfect for drinks and desserts.

Rose Jam – artisanal, made with pure ingredients, ideal for special moments.

Rose Tea – soothing and aromatic, crafted from carefully dried natural flowers.

Gift Sets – elegant combinations of syrup, jam, and tea, perfect for the premium market.

Each ROZEFIR product tells a story of origin, quality ingredients, and respect for the consumer. Our products are pure, crafted with care, and made with respect for nature and people.

We are looking for partners who share our values:

Organic product distributors

Specialized bio & premium stores

Concept stores

HoReCa businesses focused on natural products

We are open to international collaborations, private label projects, and exclusive distribution, building long-term relationships based on quality, transparency, and responsibility.

ECOFRACT

Ecofruct S.R.L. is the first Organic company from Romania, its founders being among the promoters of the economic activity in the Ecological field, both in Romania and in Germany.

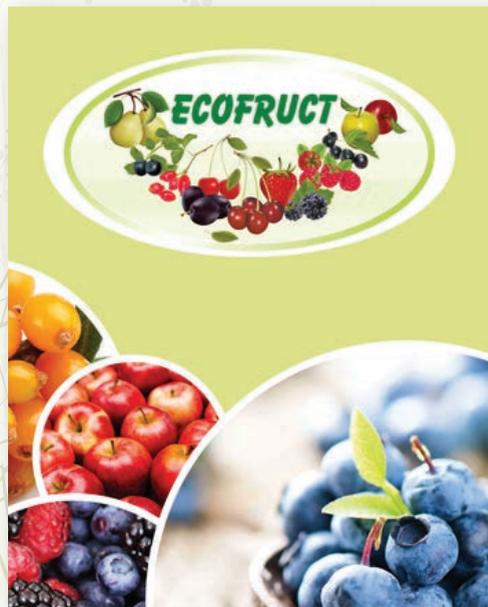

Being well known in the European market, especially in Germany, but not only, Ecofruct company enjoys a total success on the export market of Organic fruits, plants and mushrooms.

The supply activity of the company is spread all across the country through our collaborators, firms or individuals who within local communities facilitate the enhancement of the BIO products thus ensuring better management of the firm.

The collection and the acquisition takes place by strictly respecting the European regulations in

Organic production and not only. Therefore, Ecofruct company is Organic certified under the following standards: EC 848/2018 (European Union) and BIO-Suisse (Switzerland). Ecocert S.R.L. is the inspection and certification body which ensures the good development of the business according to the Organic European norms. For a better way of doing things, in terms of product quality, the company URS (United Registrar of Systems) Romania is responsible for implementing ISO 22000 quality system.

Ecofruct company offers the following categories of organic products, which originate in the extremely rich and diversified spontaneous flora of the Romanian Carpathian Mountains: forest fruits (berries), medicinal plants, herbs and mushrooms.

EVICOM HONEY

Hello there.
Meet COLONIA (EN - colony) a romanian family of spry bees.

They leave in a remote area, hidden between green, sunny hills at the footsteps of Southern Carpathians, in Romania.

And they do what bees do best: extract the goodness from flowers around and make nurturing and healing honey.

Few years ago they establish a partnership with some humans - Ocneanu family.

The humans committed to take best care of them, providing nice wooden hives and all bees need all year long.

And the bees entrusted them their astonishing honey to make astonishing and sometimes unique honey based products.

Discover now & here, the secrets of nature captured in the purity of COLONIA raw honey!

EVICOM HONEY S.R.L.

FUENTE DE LA SALUD VASMAR

RAW HONEY

HONEYMAN UK
packed by beekeeper

Our dynamic company offers a wide range of organic high-quality honey. Our mission is to supply certified organic, healthy and flavoursome bee products, packed in elegant jars, to enhance each taster's experience.

In order to achieve our mission, we provide only carefully selected premium-quality honey. Our honey is extracted through traditional methods, process which maintains its nutrients, high pollen content and authentic aroma, our customers getting a perfect, rich 100% organic honey. Differing from a mass production process, our certified organic honey is skilfully produced in small batches, maintaining our products' premium quality.

Equally, we put our passion in providing the best packaging, allowing a good preservation and presentation, each jar has been carefully chosen, after a long analysis process of ergonomic and aesthetic features. In addition to distinctive content, our products have a special embossed paper for label with elegant design that mimics the slow flow of our

honey and the handmade wooden lid, sculpted carefully from raw beech, enriches the jars, giving them a special hue of true artisan product.

We pack certified organic bee products in a wide range of square glass jars and we have a retail range: 150g, 250g, 420g, 500g, 1kg as well as a HORECA range: 12g paper socket, 20/40g plastic casserole, 30/40g small glass jar, 150g jar for hotel's boutique, 2.3kg jars or 5kg plastic pail for kitchen use as well as our large acacia honeycomb frames on stainless steel display for morning buffet.

GIOFRAL

We are Giofral and we are a group of companies, a family business situated in Ianova, jud.Timis, Romania in a hilly area surrounded by forests. Our land surrounding the farm covers 500 hectares but the same group of companies manages 3000 certified organic hectares;

We grow wheat, sunflowers, corn, soybeans, rapita, barley, oats, lolium; Besides growing cereals and oilseeds, we own a cold-pressed oil factory equipped with state-of-the-art equipment.

We produce about 12,000 liters of sunflower oil per day and we produce on average 22,000 kg of cake per day.

From the sowing of the sunflower seeds to the finished product (oil, cake) all these stages belong to us.

We have storage capacity of over 10,000 tons, but we also store in silobags where the storage capacity can reach up to 20,000 tons.

We produce and market the following cereals and oilseeds: wheat, corn, soya, rapeseed, flax, sunflower, sunflower and rapeseed cake, sunflower and rapeseed oil.

Protein - 25% / Fats - 11%
/ Umidity - 7%

rape represents about 15%
of total area cultivated

wheat represents about 35%
of the total cultivated area

corn represents about 10%
of the total cultivated area

soy represents about 15%
of total area cultivated

sunflower represents about
25% of total area cultivated

Protein - 30% / Fats - 11%
/ Umidity - 7%

Acidity: max. 1,5 %
After processing about 35-38% is oil
and 62-65% is sunflower cake.

HERTA BIO APICOLE

My name is Cosmin Herta and I am the CEO of Herta Bio Apicole, a Romanian family business in the heart of Marginimia Sibiului, born out of respect for nature and passion for clean beekeeping.

Here are some details about us:

We are a team of professional beekeepers with over 15 years of experience, specialized in the production and marketing of certified organic beekeeping products - from raw honey, pollen and royal jelly, to functional mixes and honey syrups. We differentiate ourselves through double organic certification: both for bee colonies (no antibiotics, no sugar feeding in winter), and for the bottling and packaging line - according to the strictest European standards.

● **Recognition and partnerships**

We are the official suppliers of the Ministry of Agriculture

and Rural Development of Romania, and our boxes of organic honey are offered as gifts during official delegations to political, cultural and diplomatic figures.

A historic moment for us was in 2024, when the Prime Minister of Romania offered Herta Bio Apicole honey to Pope Francis at the Vatican, confirming the authenticity and prestige of our brand - independent of any political color.

Our products were also offered to Her Royal Highness Princess Sofia of Romania and the European Commissioner for Agriculture, Christophe Hansen, ambassador of European values in support of organic agriculture.

● **Awards and distinctions**

➔ Double gold medalists at the European Organic Festival (2023 & 2024)

➔ "Gustul Ales" Trophy - the best organic product in Romania (2024)

➔ MADR Diploma of Excellence for contribution to organic agriculture

➔ 2nd place in Europe at the EU Organic Awards 2025 (Brussels) - "Best organic company in Europe" category

(We are the first European in the field of beekeeping products, being surpassed only by the largest artisan bakery in the world, from Austria.)

● **We represent Romania at the most important international fairs:**

➔ SIAL - Paris (2024)

➔ Seoul Food & Hotel - South Korea (2024 & 2025)

➔ ANUGA - Cologne (2024 & 2025)

➔ BioFach - Nuremberg (2024 & 2025)

MANOR LABORATORY CENTER

MANOR Laboratory Center SRL, the first private food control laboratory in Romania. Established in 2000.

We are opening in Ploiesti the new laboratory for food control, prepared to become the first ORGANIC food control laboratory in Romania.

Departments:

➤ Physico-chemical analysis section

➤ Microbiology section complete automation in the preparation of culture media. Full automation of seeding and sample reading.

We are streamlining the number of analyzes performed in such a way that with two microbiologists

we manage to do at least double the analyzes that are done in the old laboratory in Bucharest with three microbiologists.

➤ Pesticides and Heavy Metals Residue Section.

Agilent gas chromatography and mass spectrophotometer instrumentation.

The current market of BIO analyzes of BIO Romania members who export and currently do their analyzes in Bulgaria, Hungary, Poland and Germany, is over 20 million euros/year.

In 2 years AT LEAST 50% will be the clients of MANOR Laboratory Center!

God help us!

MUDAN GADAL GADAL TEA

Gadal Tea is a wholehearted admiration of the centuries old art of tea-making and a desire to bring its spirit back, with a contemporary sensibility. Gadal, which translates to “uplifting”, is an idyllic state that provides tranquility, way above the pace of everyday life.

Each collection comprises of a variety of organic teas blended from pure natural ingredients, and expresses, in its own distinct way, the principles of Gadal Tea.

All products are designed in keeping with the requirements of reducing the environmental impact.

Sustainable packaging, organic-certified ingredients and a constant care for finding local raw materials have been part of Gadal Tea since the very beginning.

ORGANIC GREEN COOPERATIVA AGRICOLA (MAMAIANA)

OUR STORY:

Mamaiana – A Ritual of the Land

Mamaiana was born from the earth itself –from fertile soil, patient hands, and a deep respect for nature and people.

In Negrasi, Arges County, Romania, on fields cultivated organically for more than a decade, we learned to listen to the land.

No chemicals. No shortcuts. Only time, care, and balance.

Because the earth remembers everything we give to it. And it always gives back.

Pure Origins

Mamaiana was created with one simple purpose: to carry the harvest forward in its purest, most honest form.

This is how our cold-pressed oils and wholegrain flours came to life – slowly made, minimally processed, and full of natural vitality.

ORGANIC GREEN COOPERATIVA AGRICOLA

Brand Name: Mamaiana
Address: Str Petre Badea Nr. 325, Negrasi, Arges, Romania
Web site: Mamaiana.ro
E-mail: Vanzari@Mamaiana.ro
Phone: +40-751.600.600

Every ingredient is 100% organic, locally grown, and carefully transformed close to the fields where it begins its journey.

Nothing added. Nothing taken away.

A Name Rooted in Ritual

The name Mamaiana comes from an ancient Romanian rain ritual – a ceremony of gratitude, hope, and renewal.

Long ago, villagers shaped a small figure from earth, adorned it with flowers and candlelight, and released it onto flowing water.

As they did, they sang an invocation to call the rain –the rain that would nourish the fields and sustain life.

Mamaiana was a symbol of trust in nature’s rhythm, of humble respect for the land, and of the sacred bond between soil, food, and people.

Our Philosophy

Today, Mamaiana carries this ritual forward – not as a memory, but as a way of working.

We believe that true quality begins in the soil. That food should be clean, transparent, and alive.

And that caring for the earth means caring for future generations.

In every bottle and every paper bag, Mamaiana holds a promise: to honor nature, respect tradition, and offer food that nourishes – deeply and honestly.

From the Heart of the Land. For You!

REGIU PLANT

REGIU PLANT S.R.L. established in 2015, has the main activity the collection, conditioning, drying and packaging of medicinal plants, forest fruits, mushrooms and walnuts. In addition, the company offers sea buckthorn oil, made by cold pressing. Collection area: the mountain and hilly areas of Transylvania. Situated in a nature-blessed area, the company is still small but growing, with a young and enthusiastic staff in terms of the benefits and future of herbal products, both in the form of teas and processed foods further in the form of tinctures, powders or medicinal oils. As a result, the company continuously develops the production and processing capacity of raw materials offered by nature, and will equip itself with the latest

generation of equipment and machinery so that it will soon be able to manufacture a wide range of products. Our future goal is the optimal combination of "quality-performance-price" and the focus on the production and marketing of BIO natural products in order to promote the consumption of nutrient-rich products and active substances from spontaneous flora.

TRANSILVANIA NUTS

At Transilvania Nuts, a leading walnut and natural snack processors in Central and Eastern Europe, with 100% Romanian capital, we are building a whole culture around nuts, dried fruits, and seeds. We benefit from modern technology and premium raw material and our propeller is the enthusiasm of a team of professionals who meet, day by day, the standards required by the certifications obtained.

TRANSILVANIA NUTS LTD
Address: 36 Calea Alba Iulia Street, 517241 Drambar, Ciugud, Alba County, Romania
Web site: transilvanianuts.ro
E-mail: office@transilvanianuts.ro
Phone: +40-358.401.138; +40-358.401.423

As mother nature prepares perfect snacks, we bring added value by developing, with premium ingredients, a portfolio of natural, delicious, and nutritious products. We offer the world's most popular nuts (walnuts - conventional or organic walnut kernels, almonds, pistachios, cashews, hazelnuts), dried fruits (apricots, cranberries, raisins, dates, plums, and so on) and seeds (pumpkin, sunflower, poppy, sesame, flax, chia), in a wide variety of formats - bulk and packaged products (snacks from nuts, dried fruits, and seeds), raw and baked.

To guarantee the highest quality we make sure to take into account all the aspects of the production process. Thus, optical sorting takes the selection of walnut kernel to a whole new level of excellence and efficiency, due to the precision of this cutting-edge technology.

Flexibility is one of the strengths that give us the opportunity to develop customized products according to the requirements of our partners. We can supply a wide range of solutions, with production capabilities and sources of raw materials or packaging to ensure the needs of our partners.

We take pride in adhering the highest industry standards and certifications, ensuring that every project we tackle is of remarkable quality, regardless of its size. Transilvania Nuts is a promise!

ASSOCIATION OF ORGANIC FARMERS BIO ROMANIA

Association of Organic Farming Bio Romania is a private non-profit, non-governmental and apolitical Romanian legal entity, a partner of ecological agriculture operators .

The Bio Romania Association advocates for the sustainable development of Romanian agriculture and rural areas for educating, informing and raising awareness of the benefits of organic agriculture for both human health and nature, by promoting the consumption of organic food.

The Association brings together members of the oraganic sector in Romania, producers and exporters of cereals (wheat, barley, oats, corn, peas, millet, etc.), aromatic plants (coriander), medicinal plants, berries, honey, lime and dairy products, beef and mint meat, flour and bakery products, apple juice, grapes, berries juice, international varieties of wine, but also unique Romanian varieties, but also a range of traditional Romanian products certified ecologically (traditional Romanian cow, goat and sheep cheese).

The quality of Romanian organic products is of special value due to the pedo-climatic conditions of Romania. Romania has a varied, unpopulated relief, and in the hilly and mountainous areas, food is still produced in the traditional system with a special nutritional value!

Romania has the potential to become the BIO Garden of the World!
